JetMaster: The cost effective solution for display and gallery wraps

Whether you're creating prints for an exhibition or for a more permanent display, a simple, reliable and low-cost solution is the best option. The Jet Master Display System for photo, fine art papers and canvas is the ideal gallery wrap system.

With JetMaster, durable, lightweight gallery wraps can be created in minutes, using just a craft knife and a cutting surface. The base is a pre-cut, pre-laminated corrugated board to which you simply trim and adhere your print, and fold over the edges. No bubbles, untidy corners, staples or hooks. A fully assembled JetMaster 'gallery wrap' is so light it can be hung from just one tack.

JetMaster provides a display system that matches digital printing for quality and flexibility. It provides a premium display option that is simple, effective and – just as importantly – low cost.

With JetMaster the days of outsourcing the stretching and fixing of canvases for gallery wrap presentation are over. The benefits to you are speed, lower cost and the ability to offer your customer genuine one-stop solutions. Take control with JetMaster.

Assembly Instructions

STEP 1:
Trim the image to the finished size, using the crop marks printed from the template.

STEP 2:
Gently peel off the release liner from the adhesive backing.

STEP 3:
Position the image and press it to the exposed adhesive, taking care to align it correctly with the perforated edges.

STEP 4:
Turn JetMaster over and gently press the image to the adhesive backing until the entire image is attached to the JetMaster.

STEP 5:
Turn the JetMaster Image-side down. Trim excess corner material and discard.

STEP 6:
Fold the precut flaps inward to create the side section of the frame. Press the adhesive side section and tabs firmly down.

STEP 7:
While folding the precut flaps inward, tuck the corner of the canvas into the joint. Press the adhesive flap firmly down.

STEP 8:
Use the supplied sticky pads to hold the corners in place. Use the remaining pads to hold the middle of the panel down.

STEP 9:
Hang (from just one tack or nail) and enjoy the image.
