ONYX RIP PRODUCTS

Simplicity in achieving superior prints

ONYX PosterShop provides a versatile tool set with color managed output that is easy to use. Add automation with finishing tools for complete print-and-cut workflows.

Which Postershop version do I choose

With ONYX 18 you can now choose between 4 different verisons of Postershop.

Postershop
Postershop One
Postershop One Limited
Postershop Textile

All Postershop versions contain APPE 4.8, Swatchbooks, Bleed, Grommets, Spot Layer Tool and Cut server.

Postershop	2 active printers and ICC profiling
Postershop One	1 active printer and ICC profiling
Postershop One Limited	1 active printer no ICC profiling
Postershop Textile	Postershop with Step & Repeat

Color Management	Job Preparation	Finishing & Cutting
• Build ICC profiles with ONYX PosterShop • Print>Read>Next media profiling to easily maximize output quality • Optimized out-of-the-box presets for quick installation to get up and running • PowerChroma ink savings technology improves profitability	• QuickSets and unlimited hotfolders to speed up production and minimize errors from design to print • Job ticketing to track job data • Color Swatch Books color selection and matching • Easily modify jobs without leaving the RIP-Queue into other applications	• A fully integrated print-and-cut workflow with ONYX PosterShop • Preview cut-paths that are instantly recognized from Adobe CC applications • Add finishing marks using ONYX PosterShop with color managed previews • Cut-only workflows to import jobs directly into CUT-Server
